

SECTION II—CLAIMS

10. (Currently Amended) A method comprising:
 - ~~determining~~ reading a unique identifier ~~encoded~~ stored on a component;
 - printing the unique identifier ~~on~~ read from the component onto a plurality of first and second labels; and
 - affixing the ~~plurality of first and second~~ labels to a component container into which the component is inserted.
11. (Canceled)
12. (Currently Amended) The method of claim ~~11~~ 10, further comprising attaching the first label on a device in which the component is installed.
13. (Currently Amended) The method of claim ~~11~~ 12, further comprising attaching the second label to a package in which the device is shipped.
14. (Currently Amended) The method of claim 10 wherein printing the unique identifier on the ~~plurality of first and second~~ labels comprises encoding the identifier in a bar code and printing ~~a~~ the bar code on the labels.
15. (Currently Amended) The method of claim 10 wherein ~~determining~~ reading the unique identifier of the component comprises reading an electronically encoded identifier from the component.
16. (Original) The method of claim 10 wherein the label is made of polyester.
17. (Original) The method of claim 10 wherein the container is an electro-static discharge bag.
18. (Currently Amended) The method of claim 10 wherein the first and second ~~plurality of~~ labels are removably attached to the component container.
